### **Reasons for Allowance**

1. Claims 1-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed for reasons of record set forth by the applicant in the remarks filed 10/25/05. In particular, the arguments toward new limitations of "said active regions and said resistor elements extend toward a same direction" and "resistor elements...not formed on said active regions".

Claims 2-3, 11, and 13 are allowed as being properly dependent upon allowed claim 1.

Claim 4 is allowed because none of the prior art of record, in combination with the other claimed features, fails to teach wherein said insulating film under said resistor elements is set to a predetermined width by said active regions, wherein said predetermined width is defined by an amount of shift in resistance value of said resistor elements, said amount of shift being defined by said predetermined width.

Claim 5 is allowed for reasons of record set forth by the applicant in the remarks filed 10/25/05. In particular, the arguments toward new limitations of "resistor elements formed on an element isolating insulating film" and "active regions and said element

isolating insulating film are furnished with dummy gate electrodes constituting the same layer as that of said resistor elements".

Claims 6-10, 12, and 21 are allowed as being properly dependent upon allowed claim 5.

Claim 14 is rejoined and allowed for the limitations of patterning the conductive film on the insulating film to form rectangular resistor elements extending between any two active regions (resistors on insulating film only, insulating film separating active regions) and the resistor elements parallel with the active regions. This limitation, in combination with the other limitations of claim 14 is not taught or suggested by the prior art of record.

The method claim thus forms the device of allowed claim 1.

Claims 15-20 are allowed as being properly dependent upon allowed claim 14

Claim 22 is allowed for reasons of record set forth by the applicant in the remarks filed 10/25/05. In particular, the arguments toward resistors between portions of the active regions and on the element isolation insulating film, and the new limitation of "said active regions and said resistor elements extend toward a same direction".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
